

NJABULO B. MAVUSO

IT Support | Systems Administration | Network Troubleshooting | Digital Microservices

Mbabane, Eswatini | njabulob.mavuso@gmail.com | +268 78361103 | linkedin.com/in/njebz-ncele

PROFESSIONAL SUMMARY

Resourceful and highly adaptable IT professional with specialized experience in systems administration, server installation, and network infrastructure. Proven track record of delivering high-impact technical solutions within Eswatini's public sector, specifically at the Central Statistical Office and the Ministry of Economic Planning and Development. Expert in maintaining secure LAN/WAN environments, administering server-side applications, and providing comprehensive technical support to enhance operational efficiency.

CAREER OBJECTIVE

Seeking a dynamic IT role with a technology-driven organization where I can apply my technical skills, problem-solving abilities, and public sector experience to support infrastructure, optimize systems, and contribute to digital transformation. Eager to grow within a collaborative team while delivering high-impact solutions that improve performance and accessibility for the public good.

CORE COMPETENCIES

- Infrastructure Management:** Advanced server setup, installation, and administration; configuration and maintenance of Council-wide networks.
- Network Administration:** Proficient in LAN/WAN configuration, TCP/IP protocols, network security, and troubleshooting connectivity issues.
- System Development & Analysis:** Experienced in CSpro Programming, data analysis, and system requirement specification for operational optimization.
- Technical Support:** Comprehensive hardware and software troubleshooting, printer/peripheral maintenance, and end-user support.
- Planning & Procurement:** Strong ability to assess IT needs, provide recommendations on technical issues, and manage IT asset records.
